Completion: December 2006  
Building Type: Office Building

Owner's Representative:  
Stan Tewell  
713-695-3633  
stanleyt@wfi-intl.com

This office building is home to the WFI International Houston office and supports their forging operations in Houston, Texas. The project was a collaborative effort between W.M. Dillard and the Owner as WFI wanted to obtain a certain look along the lines of their parent office in Pennsylvania while designing for the Houston market.

The building has a metal building structure with a standing seam metal roof. The exterior walls are metal stud with a block and stone exterior. W.M. Dillard & Associates priced several different options as WFI wanted to consider quite a few upgrades. A number of the upgrades were selected for the facility.
